Authorised By: James Brown (Director)

Business:	MIDA Civil Engineering Ltd		ALERT
Title:	Ordering covers and Gullies to match existing when finishing sites	Reference No:	QA31
Issued By:	Sam James	Issue Date:	23 rd Oct 2024
Type of Alert:	Quality & Compliance		
Subject:	Consistency of Ironwork		
Operatives Affected:	Groundworkers, R&S gangs		
Details:	It was noticed when finishing sites for S38 and 278 surfacing different designs and manufacturers of covers and gullies are being used on sites giving an inconsistent appearance to our final works, when finishing sites let Procurement Know what type of gully and drain cover are already on site and Procurement will try and match		
Action Required:	Ensure when ordering Ironwork to finish sites Procurement are aware of the type and manufacturer of the existing products on site		
Further Information:	Check Inonwork on site before ordering and give procurement as much notice and information as possible to ensure matches what is on site	Above photos on same bellmouth and highlights the issue	
Method for Communication:	Briefing by Site Manager to groundworkers via TBT Alert
