

QUALITY ALERT

Created By: Ben James (Quality Manager)

Authorised By: James Brown (Director)

Business:	MIDA Civil Engineering Ltd		ALERT
Title:	Installation of Insulation at Internal Wall junctions	Reference No:	QA45
Issued By:	Sam James	Issue Date:	19 th June 2025
Type of Alert:	Quality & Compliance		
Subject:	The need for Insulation at Internal Wall junctions		
Operatives Affected:	Engineers and Site managers and operatives		
Details:	Following the more frequent use of Underfloor Heating systems there is now a requirement to use the same upstand insulation on all internal walls as well as external walls 		
Action Required:	Installation of Upstand insulation on all floors on any internal wall junctions on all plots where external perimeter insulation specified, UFH plots and otherwise, to avoid detail being missed		
Further Information:	Site Specific details and Drawings to be checked		
Method for Communication:	Briefing by Site Manager to groundworkers via TBT Alert
