

Environmental Policy Statement

MIDA Civil Engineering Ltd recognises and accepts that concern for the environment is an integral and fundamental part of our corporate business strategy.

As such, we seek to actively reduce our negative impact on the environment to the lowest practicable level through recognition of our responsibilities, through continual improvement of our environmental management system and working practices, compliance with relevant legislation and standards and care for the global, national, and local environment.

Any threat of pollution from our activities will be identified and either prevented or effectively controlled in so far as is reasonably practicable.

To help us achieve these aims we have implemented, maintain, and continually improve a formal integrated Health, Safety, Environmental and Quality (HSEQ) management system that satisfies the requirements of *ISO 9001:2015*, *ISO 14001:2015* and *ISO 45001:2018* and any other relevant statutory, regulatory requirements and any recognised standards that affect the delivery of our services.

We aim to achieve environmental compliance and improvement through the setting and review of relevant targets and objectives; and the use of trained and competent personnel and suitable resources to deliver them.

Our overall aims are to:

- Aid in the protection of the local, national, and global environment in so far as is reasonably practicable, including the prevention of pollution and the protection of eco systems and protected species and flora and fauna;
- Reduce consumption and costs whilst satisfying our needs for energy, water, and business travel;
- Reduce the environmental impact of our organisation through better management of materials and resources;
- Integrate environmental and sustainable principles into our operational procedures and by promoting environmental best practice at every level;
- Use, where practicable, recyclable, and renewable materials;
- Continually improve our environmental performance where reasonably practicable; and
- Fully comply with identified relevant environmental legislation.

This statement is brought to the attention of all employees, suppliers, and contractors. Copies are also freely available to the public, regulatory authorities, customers, and any other interested parties upon request.
